The Enterprise Communication Platform unites two market leading technologies to create the next generation of corporate video communication platforms.

The solution offers corporations the capability to use all digital channels in a way which maximises internal and external communications. This flexibility enables the content shown throughout the enterprise environments to be current, exciting and varied, engaging your audience faster and holding their attention for longer.

For more than 10 years, ONELAN and Encoded Media have delivered signage and IPTV to a wide range of banking, finance and corporate worlds, including:

The Bank of England, JPMorgan, BMW, Legal & General, S&P, BG Group, Network Rail, TalkTalk, Lego, Three, UU, EDF Energy, Admiral, Thames Water, Betfair, Santander, Royal Bank of Scotland, Environmental Agency, Invesco, Zurich Insurance, AMC Networks, Virgin Holidays, NHS, London Fire Brigade, Nestlé, Thales, Siemens, PricewaterhouseCoopers and the BBC.

From one screen to thousands: Live stream TV, PowerPoint presentations, performance indicators, employee communications, news and integrated apps.

WHY SIGNAGE & IPTV?

The content can be diverse and interchanged easily so your information stays relevant and engaging

- Communicate to employees and visitors through an innovative medium which reflects a forward thinking corporate attitude
- Welcome your visitors with general information and messaging
- Communicate with staff to improve staff morale and help create a better-informed workforce
- Enjoy cost savings over traditional posters, banners and print content
- Reinforce your corporate image with a consistent brand message to staff and visitors
- Show a constantly updated schedule and video feeds of meetings
- Page your visitors and staff instantly and effortlessly
- Grab people's attention using video, motion graphics and punchy text

WEB PAGES AND RSS NEWS FEEDS

CALENDARS, SCHEDULES AND MENUS

DYNAMIC COMPANY INFORMATION SUCH AS KPI

SIGNAGE APPS - WEATHER, SOCIAL MEDIA, TRAVEL DEPARTURE BOARDS & MORE

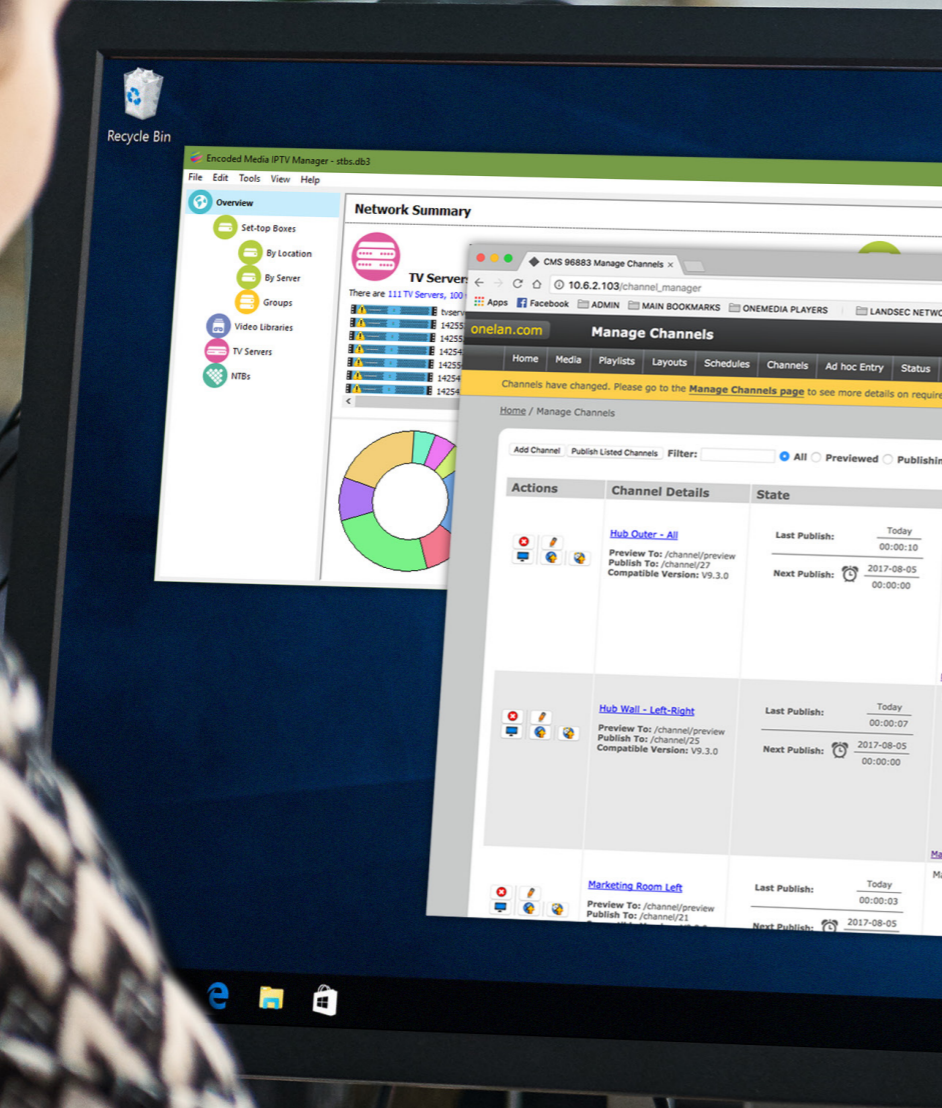

CUSTOM APPS - VISUAL CONTENT WITH API ACCESSED DATA INTEGRATIONS

HOW IS IT MANAGED?

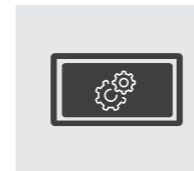

CONTENT IS MANAGED VIA A SIMPLE WEB-BASED USER INTERFACE

- Easy to administer from your desktop, laptop or tablet
- Centrally controlled from the local network or remotely
- Drag and drop your content into place
- Display content by location, or triggered by rules based on external indicators (e.g. call volume, stock levels, weather)
- Schedule content for playback at a defined time of day, day of week, or on a specific date
- Tool allowing departmental input of messages, announcements, layout changes and more by authorised staff members

TV SERVER AND HD ENCODER HARDWARE

A range of products which receive channels from a TV aerial, satellite dish or local feeds, and deliver to display screens and signage via your network.

SIGNAGE CONTENT MANAGEMENT SYSTEM (CMS)

The CMS leverages more than a decade of development and industry experience to make creating, publishing and administering content simple and dependable. The included management tool features a simple multilingual web user interface to create full screen and multizone content channels, a range of enterprise tools are included as standard, including LDAP integration and sophisticated roles-based access control. The CMS can be deployed on premises where internet connection is not available.

*It's simple to manage and can be tailored to your needs as a business.
Your differing content can be shown on multiple screens, allowing you to
communicate with staff on a wide level at the same time.*

HOW IS IT DISPLAYED?

COMMUNICATE YOUR MESSAGES CENTRALLY ACROSS A VARIETY OF PLAYBACK DEVICES

SET-TOP BOX

Our small, solid state network device connects to screens via HDMI cable. Using the supplied IR remote control, users can select signage playout or live TV channels, delivering live and recorded streams to physical displays.

DEDICATED SIGNAGE PLAYER (NTB)

Used for touch interactions, 4K playout and video walls. Our range of rack mounted and small form factor HD and 4K signage players offer high quality multimedia playback.

SMART TV (SOC)

System on Chip compatible for supported screens from LG and Samsung. This provides a cost effective solution without the need for a physical signage player.

PC AND LAPTOPS

Existing desktops can receive both live TV and digital signage content. Software for Windows PCs allows authorised users to watch content directly on their desktop.

HANDHELD DEVICES

Staff and visitors can view digital signage and TV channels on their mobiles or tablets

HOW IS CONTENT PRODUCED?

ENGAGE YOUR AUDIENCE WITH BRANDED SCREEN DESIGNS AND DYNAMIC CONTENT

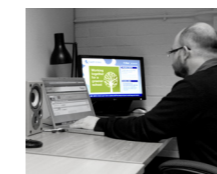

- Screens can be divided into multiple content zones via a drag and drop web interface
- Include live playback zones for TV, news and more
- Strengthen corporate branding with your logo, company colours and fonts
- Make your own templates, or use our partner design agency, onemedia

onemedia are experts in creative content design for Digital Signage/Video walls/Signage and Control App development/ Bespoke UI solutions and Touch/ interactive solutions.

SCREEN LAYOUT DESIGN

onemedia create fresh and appealing screen layout designs which reflect your brand whilst being easy to manage and update on screen.

CREATIVE CONTENT PRODUCTION

Send us your ideas, words/PowerPoint presentations/video footage and we will turn them into professional looking content ideally suited for digital signage.

INTERACTIVE SOLUTIONS/ APPS

onemedia are experienced in creating a wide range of customised interactive, dynamic content for your signage player including multiple bespoke apps.

SIGNAGE APPS

Attract and engage your audience with live, dynamic and fresh content ready for your digital signage.
